Acknowledgment

The authors thank the Department of Software Engineering, Daffodil International University, for its support and the JaalTaka creators for releasing their data.

Author Contributions

D. Biswas: conceptualisation, software, experiments, analysis, and original draft. I. Mahmud: supervision, methodology review, and manuscript editing.

Author Biographies

Debobrato Biswas received the B.Sc. degree in Computer Science and Engineering from Daffodil International University, Dhaka, Bangladesh, in 2022. He is currently pursuing the M.Sc. degree in Software Engineering at Daffodil International University. His research interests include computer vision, deep learning, machine learning, and image processing with applications in financial security and document authentication.

Imran Mahmud received the Ph.D. degree in Computer Science. He is currently an Associate Professor with the Department of Software Engineering, Daffodil International University, Dhaka, Bangladesh. His research interests include artificial intelligence, machine learning, software engineering, and information security. He has published numerous papers in international journals and conferences.
